

VPLL Field Set-up / Tear Down

- **Before Practice / Game:**

- If you are the first Practice or Game of the day (Weekend or Weekday), please help with the following:
 - Remove tarps from home plate and pitching mounds.
 - Setup the bases (AAA & SE bases are located in the container by SE field, SW bases located in storage container behind the backstop, AA bases located in storage container next to 1B dugout.)
 - Drag the field (if needed) – Field crew will be there on gamedays to paint lines, but may not have enough time to drag and water the field. DO NOT WAIT to start your game due to fields not being ready.
 - PLEASE DO NOT DRAG OVER THE GRASS AREA! This is the quickest way to kill the grass.
 - Rake baselines, around each base, and home plate area (RAKE WITH THE BASELINE AND DO NOT PUSH DIRT INTO THE GRASS AREA)

- **After Practice / Game:**

- If you are the last practice of the day, please do the following:
 - Remove bases and put them in the Storage bin/locker next to the field.
 - Replace all base plugs in receptacles.
 - Replace tarps on home plate area and pitching mound. Be careful not to place tarps over the grass area.
 - Water down all dirt areas. Use the hose to dust the mound and home plate area before placing the tarps back on.
 - If you notice dry areas on the grass infield and surrounding skirt, please water those areas.
 - If there is another team practicing after you, ask them if they would like you to drag and rake the field.

- **General Rules:**

- If you are the last to leave the field and no other coaches or players are around, make sure ALL doors are locked and then lock the gate behind you once all players and coaches have left the fields.
- Communicate any issues with fields (i.e., sprinklers, leaks/overwatering, missing base plugs, dead grass, etc.).
- Pick up all trash in dugouts or around the fields, especially if it is left by your team.
- Leave the field better than you found it!
